

- Newsletter: **Nothing new to report**
- Website: **The website has been updated with the latest 2025 membership info**
- Club Raffle: **Jay and Marsha brough a Spitfire EP kit, a DXS radio, and some goodie baskets that Marsha picked up at another event.**

8. Committee reports:

- Events: **Upcoming swap meets: Woodland Davis – March 15; Oakdale – March 29; Livermore – April 26. RC car event at LFE on March 22. GCF Fun Fly on April 12. Control line combat at GCF on April 25, 26 and 27.**
- Promoting Flying: **Dan Calhoun mentioned that he is working with another club to build a Falcon 56 for the EAA youth program. Several youth participants are involved and this year-long project is almost complete. Also, a discussion took place following the meeting about inviting some schools (or a home-school group) to bring some youngsters out to our field to experience RC flying. More planning is needed, but it sounds promising.**
- Field Maintenance: **Alan has started with a light mowing for the year and more is expected once the weather dries out and warms up. Todd will replace the latch on the port-a-potty, and the company has been called to clean the port-a-potty.**

9. Announcements / Pertinent correspondence:

- **No new information**

10. Discussion of old or continuing business:

- **Lance Cook and Dick Belden have volunteered to head up a committee regarding the runway improvements. They will work with Alan Ross to get our previous estimate updated and possibly get some competing bids. As a reminder, the club is NOT considering an assessment to pay for this project, we are only considering donations and a small contribution from the club treasury.**
- **Todd is going to reach out to a fence contractor to get bids on replacing the stiles (stairways over the fences) with gates. We will also need approval from the county, and the land manager for the property to the East, in order to proceed with this project. DIY is an option, but is not preferred due to the need to re-stretch the barbed wire after the gates are installed.**
- **Lee brought some flyers for the upcoming Control-line Combat event on April 25, 26 and 27. The club voted to approve getting a second port-a-potty rented for that weekend, as a single unit has trouble handling the volume from previous years.**

11. Discussion of new business:

- **The club voted to approve getting a second port-a-potty rented for that weekend, as a single unit has trouble handling the volume from previous years.**
- **The club voted to approve continuation of the investigation into the runway improvement project. We are interested in getting bids for widening the runway, possibly lengthening it, and possibly replacing it completely (as opposed to just adding new asphalt next to it).**

- **Lance is going to get some gravel and fill in the hole that has formed in the entrance to the field. Thanks Lance!**

12. Presentation of member's modeling projects:

- **No show and tell this month. 😞**

13. Dummy of the Month: **Several members were nominated for performing ground-induced gear adjustments on their airplanes, but Lance took the prize since he managed to destroy his 78" Edge 540 on its maiden flight. According to Lance, "It just started going wacky. First it did this, then it did that, then it hit the ground." And there are reports that it wasn't his only crash that day. Hang in there Lance, we've all had days like that!**

14. Club Raffle: **Dan Calhoun won the Spitfire kit and a bag of Ghirardelli chocolates. Lance won the DXS transmitter and a gift basket. Mike Belmont won the last gift basket. Thanks for the gift baskets Marsha, they were very well received!**

**Next meeting – Wednesday, April 2, 2025 at 7:00pm!**
